

ROAD & TRACK 30 MM CARTRIDGE KIT

The new Road&Track 30 mm front fork cartridge kit from Öhlins is based on experience gained from World Supersport and Superstock Championships. It doesn't matter if you are heading for a National Roadracing title or if you are taking your bike to the local race track. The cartridge kit will give you loads of performance, stable damping characteristics and fantastic comfort.

The Kit has a unique design with compression damping and the adjustment on the left leg and rebound damping and the adjustment on the right leg – i.e. all adjustments are made at the top together with the spring preload!

The cartridge system fits bolt on and is easy to install in most standard hypersport front forks.

NOTE! This new Cartridge Kit is delivered without springs. The 08790-series of springs need to be ordered separately to suite customer's choice of spring rate.

FEATURES

- External rebound, compression and spring pre-load adjusters.
- Easy to change settings for individual preferences, based on our existing Setting Bank.
- Wide range of spring rates available in the 08790-series.
- Easy installation and service.
- Available for all Hypersport models.
